

We cover the entire plastering trade from solid plastering, fibrous plaster, lime work to external sand and cement, stucco and stone work; new or renovation.

**EVANS**  
Specialist Plasterers

# Internal Plaster

We offer a complete internal plastering service covering solid work including modern light weight plaster or more traditional materials such as lath & lime.

Cornices, panels, centre pieces, columns and arches can be supplied and fitted as new or can be restored on renovation projects. Existing plaster work can be cleaned back to its original state and repaired. Mouldings can be made to match existing or re-run in situ in plaster or lime.

# External Plaster

We specialise in sand, cement and lime rendering including ashlar or rusticated. New cornices, columns, arches, window heads and sills can be run in situ in a variety of ways while existing stucco work can be repaired as new.

Stone work can be cleaned and repaired or reproduced in natural or re-constituted stone.

We specialise in lime work including the supply & fix of hardwood riven laths, the application of coarse stuff and all lime putty finishes.

## Fibrous Plaster Mouldings Process
